PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience building scalable web applications and real-time systems. Expert in JavaScript, PHP, and Node.js with proven ability to deliver high-performance solutions. Specialized in API development, WebSocket implementations, database optimization, and system architecture.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Python, HTML5, CSS3, SQL

Frameworks: Node.js, Express.js, Laravel, React.js, Vue.js, Socket.IO, Bootstrap

Databases & Tools: MySQL, MongoDB, Redis, JWT, Webpack, REST APIs, WebSocket

Practices: Query Optimization, Real-time Systems, API Integration, Database Migrations, Version Control

PROFESSIONAL EXPERIENCE

Full-Stack Developer

June 2024 – Present

Nimble AppGenie, Jaipur, India

- Architected **The Flow**, a social media platform with Instagram/TikTok-like features, AI-powered copyright scanning, and audio streaming for 10,000+ users using Laravel, PHP, Node.js, and MySQL
- Built **PaySolution**, a payment aggregator integrating multiple gateways with admin access controls, processing concurrent transactions with 99.9% uptime using Laravel, MySQL, and JWT
- Developed React.js admin panel for **Intelligent Waves** mental wellness app, managing user interactions and hierarchical content categories with optimized performance
- Engineered **Lightning League** NFL fantasy app with WebSocket real-time gaming using Socket.IO, RESTful Node.js APIs, MySQL migrations/seeder, and Redis caching for optimal performance

PHP Developer

February 2023 – June 2024

Appentus, Jaipur, India

- Developed **Mebbe Dating App** backend with Node.js/PHP and Socket.IO WebSocket chat supporting thousands of concurrent users with optimized response times
- Built **Invoice CRM** using Vue.js and PHP, streamlining client/invoice management and payment workflows while maintaining legacy codebase
- Created **JSCL Admin & App API** delivering real-time municipal data with dashboard visualizing environmental metrics (PM2.5, CO2, UV index) and traffic data across Jaipur
- Designed **Mars Mobile App** custom form generator managing 1000+ inputs with automated rule book generator, improving rendering efficiency by 40% through SQL query optimization
- Spearheaded cybersecurity protocols for Indian Navy server network, mitigating vulnerabilities and securing classified data
- Developed multiple admin panels with custom logic for mobile APIs, data management, and role-based access controls

Web Developer

October 2021 – February 2023

Ecom Books, Jaipur, India

- Integrated multiple marketplace APIs providing solutions for e-commerce sellers, improving operational efficiency
- Created mobile web app with barcode scanning for returns verification, streamlining logistics processes
- Developed and maintained e-commerce integration APIs ensuring seamless data synchronization

EDUCATION

Master of Computer Applications (MCA), Computer Science

July 2023 – May 2025

GLA University, India

Bachelor of Computer Applications (BCA), Computer Science

July 2019 – July 2022

Poddar International College, Jaipur
